Test information sheet

Iron test

A home blood test that measures ferritin, a measure of your iron stores. A finger prick at home, posted to our lab, with your value and its usual range in your account.

About this test

What is the Iron test?

The Iron test is a home blood test that measures ferritin, a measure of the iron stores in your body.

What does the Iron test measure?

The Iron test measures one value:

- Ferritin (µg/l), a measure of your iron stores

How does the Iron test work?

You do the Iron test at home in four steps: order the kit, take a few drops of blood with a finger prick, register your kit and post it to our lab, and read your result in your account.

Novi Labtest makes the kit and manages every step; our accredited lab analyses your sample.

What do you get with your result?

You get each value with its usual range, in your account. Only you see it.

A lab result is not a diagnosis and doesn't replace advice from a doctor. If you have symptoms or concerns, or a value is outside the usual range, please contact your doctor.

What the test measures

- Ferritin (µg/l)

At a glance

Sample
Finger prick, at home

Who it is for
[who the test is for]

Result
Within [n] working days after our lab has your sample

- Alcohol wipe
- Tube stand, to fold
- Instructions
- Return envelope
- Safety bag
- Sterile gauze pad
- Plaster
- Absorbent sheet
- Printed kit box
- Shipping envelope
- Tube extender
- Test form

Questions and answers

What does the Iron test measure?

Ferritin, a measure of the iron stores in your body.

How do I take the blood sample?

With a finger prick at home: a few drops of blood from your fingertip into the tube of the kit. The tab Guide and the instructions PDF show every step.

How long until my result?

Your result is ready within [n] working days after our lab has your sample. It's in your account, and we let you know when it's there.

Who sees my result?

Only you. Your result is in your account, and you decide whether you share it, for example with your doctor.

When do I post my sample?

On the day you take it, on a Monday, Tuesday or Wednesday, so it isn't stuck in the post over the weekend.

Is the result a diagnosis?

No. A lab result is not a diagnosis and doesn't replace advice from a doctor. If you have symptoms or concerns, or a value is outside the usual range, please contact your doctor.
