Test information sheet

Vitamin test

A home blood test where you choose the vitamins: vitamin D, vitamin B12 and active B12, one or more. A finger prick at home, posted to our lab, with your values in your account.

About this test

What is the Vitamin test?

The Vitamin test is a home blood test that you put together yourself: you choose one or more vitamins, and the price follows your choice.

Which vitamins can you choose?

You choose one or more of:

- Vitamin D
- Vitamin B12, total
- Active B12 (holotranscobalamin)

All the vitamins you choose are measured in the same few drops of blood.

How does the Vitamin test work?

You do the Vitamin test at home in four steps: order the kit, take a few drops of blood with a finger prick, register your kit and post it to our lab, and read your result in your account.

Novi Labtest makes the kit and manages every step; our accredited lab analyses your sample.

What do you get with your result?

You get each value with its usual range, in your account. Only you see it.

A lab result is not a diagnosis and doesn't replace advice from a doctor. If you have symptoms or concerns, or a value is outside the usual range, please contact your doctor.

What the test measures

- Vitamin D [placeholder]

What is in the kit

- Tube with yellow cap and kit code
- 2 safety lancets
- Alcohol wipe
- Tube stand, to fold
- Instructions
- Return envelope
- Safety bag
- Sterile gauze pad
- Plaster
- Absorbent sheet
- Printed kit box
- Shipping envelope
- Tube extender
- Test form

Questions and answers

Which vitamins does the Vitamin test measure?

The ones you choose on this page: vitamin D, vitamin B12, active B12, or any combination of them.

What is the difference between vitamin B12 and active B12?

Vitamin B12 is the total amount in your blood; active B12 (holotranscobalamin) is the part that is bound for use by your body. You can choose one or both.

Do I need a sample per vitamin?

No. Every vitamin you choose is measured in the same tube of blood.

How do I take the blood sample?

With a finger prick at home: a few drops of blood from your fingertip into the tube of the kit. The tab Guide and the instructions PDF show every step.

How long until my result?

Your result is ready within [n] working days after our lab has your sample. It's in your account, and we let you know when it's there.

Who sees my result?

Only you. Your result is in your account, and you decide whether you share it, for example with your doctor.

Is the result a diagnosis?

No. A lab result is not a diagnosis and doesn't replace advice from a doctor. If you have symptoms or

concerns, or a value is outside the usual range, please contact your doctor.
